No.105/B,HospitalRoad, Ambalantota

EXPERIENCE

Associate Python Developer

11/2025 - Present

Innobot Health

- Developing and automating healthcare data workflows using Python, Selenium, and Snowflake, focusing on end-to-end workflow orchestration and process optimization.

Intern Python Developer

05/2025 - 11/2025

Innobot Health

- Developing and automating healthcare data workflows using Python, Selenium, and Snowflake, focusing on end-to-end workflow orchestration and process optimization.

Intern Data Engineer

12/2024 - 06/2025

SLT Mobitel

Sri Lanka Telecom PLC

- Contributing to the Racoon AI Project by developing and deploying data driven solutions with Python, LangChain, and JavaScript, using Docker, Kubernetes, PostgreSQL, and Redis in Visual Studio Code.

EDUCATION

BSc (Hons) in IT Specializing in Data Science (Reading)

Sri Lanka Institute of Information Technology

10/2022 - Present

Malabe

WGPA

3.54 / 4.0

GCE Advanced Level (Physical Science)

H/Theraputta National School

2A's 1B

PROJECTS

CryGuard - Baby Cry Detection & Environment Monitoring System (IOT Project)

- Developed a real-time baby monitoring system using IoT and Machine Learning to detect baby cry conditions and monitor nursery data such as temperature, humidity, motion, and light. Implemented live alerts and dashboard updates using ESP32, FastAPI, MongoDB, WebSocket, and React.js. (ESP32, Python, Machine Learning, IoT Sensors, FastAPI, MongoDB, React.js)

Hospital Data Warehousing & Business Intelligence

- Designed and implemented a hospital data warehouse using SQL Server and a Snowflake Schema. Developed ETL workflows with SSIS to extract, transform, cleanse, and load healthcare data into fact and dimension tables for business intelligence reporting. (Microsoft SQL Server, SSIS, T-SQL, ETL, Data Warehousing, Snowflake Schema, Business Intelligence)

EduPulse - Knowledge Sharing & Learning Platform

- Developed a collaborative learning platform enabling students to share knowledge, follow structured learning plans, and engage in social interactions. Implemented features for real-time notifications, milestone tracking, and secure user authentication via OAuth 2.0. (React.js, Spring Boot, MongoDB, OAuth 2.0, WebSocket)

Mobile phone recommendations system

- Developed a mobile phone recommendation system using content-based and keyword-based filtering techniques. Enabled personalized suggestions based on user preferences like brand, storage, and price range. (Python, Streamlit, Machine Learning)

House Price Prediction System

- Built a web-based application that predicts house prices using regression models. Users input property features such as size, structure, and sale details to get an estimated sale price. (React, Flask, Vite, Machine Learning)

Text Summarization and Analysis System

- Implemented NLP models to generate concise summaries of lengthy texts, improving information extraction efficiency and user readability. (Python, NLP, Streamlit, Machine Learning)

GenAI Cold Email Generator

- Created a tool that scrapes job listings from company career pages and generates personalized cold emails using portfolio links stored in a vector database. (Python, Groq, Langchain, Streamlit)

Vehicle Service Management System (IT Project)

- Developed a full-stack web-based system for managing vehicle service operations, including employee management, inventory, appointments, payments, and finance. (MERN Stack, JavaScript, Tailwind CSS)

SUMMARY

Enthusiastic and self-motivated graduate at the Sri Lanka Institute of Information Technology (SLIIT), with hands-on experience in Python development, data engineering, intelligent automation, and machine learning. Skilled in developing and automating healthcare data workflows using Python, Selenium, and Snowflake, with a focus on workflow orchestration, data processing, and process optimization. Experienced in building data-driven applications, APIs, data pipelines, and cloud-based solutions using technologies such as Docker, Kubernetes, PostgreSQL, MongoDB, Flask, FastAPI, and Streamlit. Passionate about delivering efficient, scalable, and real-world software solutions.

AWARDS & CERTIFICATIONS

- Dean's List for Year 4 Semester 2 for maintaining a GPA above 3.7.
- Merit Award Winner – CODEFEST 2024 (Algothon – Tertiary Category), organized by SLIIT.
- Participant – Mini Hackathon 2024, organized by the Microsoft Club of SLIIT in collaboration with the Faculty of Computing Student Community (FCSC).
- AWS Academy Graduate – AWS Academy Cloud Foundations.
- AI/ML Engineer – Stage 1 Certification.
- Most Popular Team Award – Mini Hackathon 2024, organized by the Microsoft Club of SLIIT.
